## Allegheny Ludlum Stainless Steel Type 301, annealed (UNS S30100)

**Subcategory:** Ferrous Metal; Metal; Stainless Steel; T 300 Series Stainless Steel

**Key Words:** ASTM A240; ASTM A666

| Component | Wt. %    | Component | Wt. %   | Component | Wt. %     |
|-----------|----------|-----------|---------|-----------|-----------|
| C         | Max 0.15 | Mn        | Max 2   | P         | Max 0.045 |
| Cr        | 16 - 18  | N         | Max 0.1 | S         | Max 0.03  |
| Fe        | 75       | Ni        | 6 - 8   | Si        | Max 0.75  |

### Material Notes:

Iron content above calculated as balance.

Allegheny Ludlum Type 301 is a high strength grade of steel available in six conditions or tempers, its resistance to atmosphere corrosion and its bright, attractive surface make it an excellent choice for decorative structural applications.

Applications include automobile molding and trim, wheel cover, conveyor belts, kitchen equipment, roof draining systems, hose clamps, springs, truck and trailer bodies, railway and subway cars. By varying the chemical composition within the limits set by the ASTM Specifications and by temper rolling, a broad range of magnetic and mechanical properties can be obtained for a variety of applications.

Information provided by Allegheny Ludlum Corporation.

| Physical Properties          | Metric             | English                 | Comments      |
|------------------------------|--------------------|-------------------------|---------------|
| Density                      | <u>8.03 g/cc</u>   | 0.29 lb/in <sup>3</sup> |               |
| <b>Mechanical Properties</b> |                    |                         |               |
| Hardness, Brinell            | 165                | 165                     |               |
| Hardness, Rockwell B         | 85                 | 85                      |               |
| Tensile Strength, Ultimate   | <u>Min 515 MPa</u> | Min 74700 psi           |               |
| Tensile Strength, Yield      | <u>Min 205 MPa</u> | Min 29700 psi           | 0.2% offset   |
| Elongation at Break          | <u>Min 40 %</u>    | Min 40 %                | in 2" (50 mm) |

|                            |                         |           |  |
|----------------------------|-------------------------|-----------|--|
| Modulus of Elasticity      | <a href="#">211 GPa</a> | 30600 ksi | transverse                                 |
| Modulus of Elasticity      | <a href="#">214 GPa</a> | 31000 ksi | longitudinal                               |
| Compressive Yield Strength | <a href="#">262 MPa</a> | 38000 psi | longitudinal                               |
| Compressive Yield Strength | <a href="#">262 MPa</a> | 38000 psi | transverse                                 |
| Charpy Impact              | <a href="#">150 J</a>   | 111 ft-lb | at 23°C; 150 J at -73°; 150J at 196°       |

### Electrical Properties

|                        |                                 |                 |   |
|------------------------|---------------------------------|-----------------|---|
| Electrical Resistivity | <a href="#">7.2e-005 ohm-cm</a> | 7.2e-005 ohm-cm |   |
| Magnetic Permeability  | Max 1.02                        | Max 1.02        | typically < 1.02 at 200H; increases with cold work. |

### Thermal Properties

|                        |                              |                                   |  |
|------------------------|------------------------------|-----------------------------------|--|
| CTE, linear 20°C       | <a href="#">16.6 μm/m-°C</a> | 9.22 μin/in-°F                    | Range 20° - 100°C                                |
| CTE, linear 250°C      | <a href="#">17.6 μm/m-°C</a> | 9.78 μin/in-°F                    | Range 20° - 300°C                                |
| CTE, linear 500°C      | <a href="#">18.6 μm/m-°C</a> | 10.3 μin/in-°F                    | Range 20°- 500°C; 19.5 μm/m-°C Range 20° - 700°C |
| Specific Heat Capacity | <a href="#">0.5 J/g-°C</a>   | 0.12 BTU/lb-°F                    | between 0° -100° C                               |
| Thermal Conductivity   | <a href="#">16.3 W/m-K</a>   | 113 BTU-in/hr-ft <sup>2</sup> -°F | at 100°C; 21.4 W/m*K at 500°C                    |
| Melting Point          | 1399 - 1421 °C               | 2550 - 2590 °F                    |  |
| Solidus                | <a href="#">1399 °C</a>      | 2550 °F                           |  |
| Liquidus               | <a href="#">1421 °C</a>      | 2590 °F                           |  |

Some of the values displayed above may have been converted from their original units and/or rounded in order to display the information in a consistent format. Users requiring more precise data for scientific or engineering calculations can click on the property value to see the original value as well as raw conversions to equivalent units. We advise that you only use the original value or one of its raw conversions in your calculations to minimize rounding error.
